Cassy v4.10.0 RELEASE REPORT · PUBLISHED 9 NOVEMBER 2026 · 8:00 PM ET

Cassy respects your chosen account, keeps reviews readable, and makes release recovery steadier.

28 changes listed across 5 areas; Tasks has the most, 12.

One dot, one shipped change. No GitHub issues are counted in this report's fixes ledger.

Release at a glance

▼ What shipped, by area

One dot is one change listed in the v4.10.0 CHANGELOG. Dots count changes, not their size or importance.

AREA	CHANGES	WHAT CHANGED
Sessions	9	Frozen-train deliveries are not reported as a stall; Answered blockers stop waking the supervisor; Detached builds settle before worker recycle; Undelivered blocked alerts; Audited artifact revocation; Honor the configured Codex worker account; Keep tool discovery within its size budget; Supervisor follow-ups reach active workers; Park against remote-only train refs
Tasks	12	Close deliveries after train publication; Recover integrated local deliveries without origin; Report automatic merge landings; Preserved independent QA evidence; Preserved fleet isolation during source checks; Retired implementer recovery; Honor release batch QA ownership during review; Delegate task work while keeping thread replies; Keep verifier questions readable; Uncertain routing holds legacy intake; Working task ownership; Executable epic timeout recovery
Releases	4	Explicit release freeze confirmation; Reproduce CI with an isolated test HOME; Declare batch ledger coverage before publishing; Recognize canonical merge-queue CI receipts
Memory	1	Read-only search deadlines
Other	2	Accept exact CLI payload round trips; Historical image-pair evidence
Total	28	5 areas

Source: CHANGELOG `CHANGELOG.md`, release-notes draft `docs/release-notes/2026-11-10-v4.10.0-slack.md`, GitHub `Richards-LLC/cassy` release v4.10.0; retrieved 9 November 2026 · 8:04 PM ET.

28

Changes listed

27 fixed, 1 added; tests, docs, known limits and upgrade notes not counted

10m 43s

Green to published

Within budget (20m 0s budget); merge-queue CI completion to publication

617 seconds

Main to published

Within the 1200-second budget; main landing to publication

78816 seconds

First child commit to main

Exceeded the 1800-second (30-minute) target

1

Queue runs used

> Changes and GitHub issues are counted separately. A change is one titled entry in the v4.10.0 CHANGELOG section; entries under Test, Doc, Known limits, Upgrade, Migration or Operator guidance headings are listed under the hood but not counted. A GitHub issue counts when release PR #1723 or the CHANGELOG section references it and it closed between the PR opening (7:30 PM ET) and 15 minutes after its merge (8:05 PM ET). Issues are closed by hand shortly after the merge, so a report run inside that window waits for referenced issues that are still open. No GitHub issues are counted in this report's fixes ledger. No release stage was blocked. No manual interventions. Not measured for this release: request to published, cut to published, lesson recurrence.

What you can do now

Your settings are respected, and reviews read clearly

Your chosen account is used

WAS

new helpers could start on a different Codex account than the one you set for the project.

NOW

they use your configured account, and the receipt says where that choice came from.

Review questions stay readable

WAS

a review question that mentioned a file location was replaced by a blank placeholder.

NOW

only the location is hidden, and the question itself stays readable.

Release holds ask before they apply

WAS

holding a release for checks could not be undone by anyone but you, without a warning.

NOW

it must be confirmed first, and the message says only you can lift it.

Answered questions stop repeating

WAS
after you or Cassy answered a stuck question, the same alert kept coming back.

NOW
an answer closes it, and a new question gets its own alert.

Artifacts can be revoked

WAS
a shared file could not be withdrawn once published.

NOW
it can be revoked with a reason; viewing and new shares stop at once, and a record is kept.

Steadier builds and syncing

WAS
a restarted helper could leave its build running and locking others out, and a working task could be reset by an old copy from Cloud.

NOW
builds stop cleanly on restart, and a task you're working on keeps its status.

Slack replies stay with the right owner

WAS
when the owner of a Slack thread was uncertain, an older intake could still pick up the message.

NOW
it reports the problem and waits instead.

03 / 06

Under the hood

Release changes

Worker accounts

WAS
the recommender picked a Codex home over the configured one, and lane changes dropped preferences.

NOW
`factory.codex_home` applies when no batch or per-worker config_dir is set, and the receipt names its source.

Verifier redaction

WAS
a local path anywhere in a summary replaced the whole field with a placeholder.

NOW
only path spans are redacted, so supervisor_call questions stay readable in notices and show/latest.

Release freeze

WAS

`train_freeze` applied an operator-only freeze with no warning.

NOW

it needs `reason="release-freeze: …"`, and the refusal names the operator-only lift. The watchdog no longer reports frozen-train holds as a stall.

Blockers and alerts

WAS

answered blockers kept waking the supervisor, and relays could expire undelivered.

NOW

replies and decision notes retire the episode, relays queue a supervisor action, and auto-merges leave a landing receipt.

Close and recovery

WAS

unpublished candidate commits blocked landed deliveries, and retired implementers broke verification.

NOW

released-train landings close, local_merge recovers without a remote, and verification survives retirement.

QA evidence

WAS

batch ledgers could not declare coverage, and repeated rounds shared directories.

NOW

`--covers` declares receipt deliveries, rounds get head-scoped paths, and premerge review honors batch-QA deferrals.

Builds and tests

WAS

recycle left guard and Cargo children holding target leases, and capped tests refused isolated-HOME prefixes.

NOW

recycle settles owned runs and leases first, and named capped tests accept HOME, Cargo, Git and CI prefixes.

Sync and search

WAS

team pull could reset a live InProgress task, and read-only search timeouts reported unknown writes.

NOW

a live owner's task stays protected, and search timeouts are reported as non-mutating with stage timings.

Artifacts

WAS

no revoke path.

NOW

an audited revoke with a reason blocks fetch, preview and shares locally, with Cloud deletion confirmed separately. Store migration 298.

Slack intake

WAS
a refused managed claim could fall through to legacy intake.

NOW
only an explicit Unmanaged allows legacy fallback. Cloud-side owner selection is still open.

Evidence and scope

Retrieved: 9 November 2026 · 8:04 PM ET.

Source: CHANGELOG `CHANGELOG.md`, release-notes draft `docs/release-notes/2026-11-10-v4.10.0-slack.md`, GitHub `Richards-LLC/cassy` release v4.10.0; retrieved 9 November 2026 · 8:04 PM ET.

Each change is placed in a product area by the words in its title, then its text; a change that matches no area is listed under Other. Correct an area in the Change map table before rendering.

Release PR: https://github.com/Richards-LLC/cassy/pull/1723 (https://github.com/Richards-LLC/cassy/pull/1723) (merged 9 November 2026 · 7:50 PM ET).

Release-notes draft: `docs/release-notes/2026-11-10-v4.10.0-slack.md`.

CHANGELOG source: `CHANGELOG.md`.

GitHub release: https://github.com/Richards-LLC/cassy/releases/tag/v4.10.0 (https://github.com/Richards-LLC/cassy/releases/tag/v4.10.0), published 9 November 2026 at 8:00:44 PM ET. Release tag object: `5657b0a8f`; main landing: `da583fe07387d68ea64ad0ee2705d98405703a35`; release commit: `1cdfc2668`.

Release receipt (relative to `~/.cas/artifacts`): `release/v4.10.0-latency/release-latency.receipt`.

Pipeline latency

First child commit to main took **78816 seconds** against an **1800-second** target: the 30-minute target was missed. Main to published took **617 seconds** against a **1200-second** budget: within budget. One merge-queue run was used: 42728976231 (https://github.com/Richards-LLC/cassy/actions/runs/42728976231). Green to published was **643 seconds**, measured from queue completion at 7:50:01 PM ET to publication at 8:00:44 PM ET on 9 November 2026. Main landed at 7:50:27 PM ET. These endpoints differ; no tag-push latency is asserted.

Per-stage timings are unavailable: the latency receipt records no STAGE_SECS.

No source warnings.
