Release at a glance

▼ What shipped, by area

One dot is one change listed in the v4.12.0 CHANGELOG. Dots count changes, not their size or importance.

AREA	CHANGES	WHAT CHANGED
Sessions	2	Quiet expired transcript mirrors; Preserve current-session delivery warnings
Tasks	1	Keep returned delivery release notes
Total	3	2 areas

Source: CHANGELOG `CHANGELOG.md`, release-notes draft `docs/release-notes/2026-11-10-v4.12.0-slack.md`, GitHub `Richards-LLC/cassy` release v4.12.0; retrieved 10 November 2026 · 7:45 AM ET.

3

Changes listed

3 fixed; tests, docs, known limits and upgrade notes not counted

14m 28s

Main to published

868 s against 1,200 s; within budget

Each titled CHANGELOG entry counts once; tests, docs and guidance are excluded. GitHub issues count separately when referenced by PR #1744 or the CHANGELOG and closed between the PR opening (7:08 AM ET) and 15 minutes after merge (7:42 AM ET). Zero issues qualify. No blocked stages or manual interventions were recorded. Request-to-publication, cut-to-publication and lesson recurrence were not measured.

What you can do now

Quieter alerts, steadier closes

No more stale delivery alerts

WAS

after an update, replies from earlier sessions that never reached a device set off an alert every minute or so.

NOW

replies from earlier sessions expire quietly; a reply from your current session that never arrives still raises an alert, so a lost decision is caught.

Fixed work closes the first time

WAS

a fix that came back for changes could be refused at close because its changelog entry was edited while merging.

NOW

the entry is recognized wherever it was edited, so the close goes through.

03 / 06

Under the hood

Release changes

Transcript mirror expiry

WAS

the 4.11 expiry notice sent one blocker per tick to the current supervisor for every expired, undelivered mirror, including ones authored by previous sessions.

NOW

prior-session mirrors retire without a blocker; a mirror authored during the current supervisor session that expires undelivered still warns once, and durable outbox retries continue.

Close changelog gate

WAS

a returned delivery that merged its target and edited its own fragment in the merge commit was refused as missing a changelog fragment.

NOW

the gate keeps task fragment provenance across returned merges, while merged-in fragments from other tasks still don't count.

Evidence and scope

Retrieved: 10 November 2026 · 7:45 AM ET.

Release PR: #1744 (https://github.com/Richards-LLC/cassy/pull/1744) (merged 10 November 2026 · 7:27 AM ET).

Release-notes draft: posted User and Dev wording (https://github.com/Richards-LLC/cassy/blob/main/docs/release-notes/2026-11-10-v4.12.0-slack.md).

CHANGELOG source: three shipped entries (https://github.com/Richards-LLC/cassy/blob/v4.12.0/CHANGELOG.md).

GitHub release: v4.12.0 (https://github.com/Richards-LLC/cassy/releases/tag/v4.12.0), published 10 November 2026 at 7:42:27 AM ET. Tag commit `7ce03e0eb`; main landing `01df2dc7768570578021fda791e2c79d444f1d77`.

Release receipt (relative to `~/.cas/artifacts`): `release/v4.12.0-latency/release-latency.receipt`.

Published downloads: macOS ARM64 (https://github.com/Richards-LLC/cassy/releases/download/v4.12.0/cas-aarch64-apple-darwin.tar.gz), Linux x86_64 (https://github.com/Richards-LLC/cassy/releases/download/v4.12.0/cas-x86_64-unknown-linux-gnu.tar.gz), Commander deployment record (https://github.com/Richards-LLC/cassy/releases/download/v4.12.0/hub-deployment.json). Full digests and sizes appear above.

Publication receipts: User thread (https://petra-stella.slack.com/archives/C0B44GUKDK2/p1794314623969749), Dev thread (https://petra-stella.slack.com/archives/C0B44GUKDK2/p1794314633798519). Release review artifact `art-97afef6a`; batch QA ledger `art-0da39f78` reports all release deliveries PASS and a pre-existing adjacent failure, `cas-a519`, outside this release. No before/after images are included: no real matched captures accompany these delivery and changelog fixes.

Pipeline latency

The 30-minute first-child-commit-to-main budget was missed: 29,592 s versus 1,800 s. Main landed at 7:27:59 AM ET and publication completed at 7:42:27 AM ET (868 s); merge-queue CI finished at 7:27:33 AM ET (894 s to publication). Both publication measures were within the 1,200 s budget. One queue run was used. These are measured endpoints, not estimates.

Stage timings are unavailable: the latency receipt records no STAGE_SECS.
