Release at a glance

▼ What shipped, by area

One dot is one change listed in the v4.17.0 CHANGELOG. Dots count changes, not their size or importance.

AREA	CHANGES	WHAT CHANGED
Sessions	4	Supervisor guidance fits the session-start budget again; Commands and messages reach a scrolled supervisor; One close-recovery rule; Shell syntax checks
Tasks	5	Retain premerge candidate approvals; Wildcard reply receipts; Independent review for decisions; Review included deliveries before cutting; One receipt, one close action
Messages	1	Group repeated notices
Total	10	3 areas

10

Changes listed

7 fixed, 3 changed; tests, docs, known limits and upgrade notes not counted

19m 44s

Main to published

Met the 20m budget; merged release to GitHub publication

6h 29m 2s

First child to main

Missed the 30m budget; first child commit to merged release

1

Queue runs

One merge-queue run proved the final tree

20m 8s

Green to published

Over budget (20m 0s budget); Merge-queue CI completion to publication

15 of 15

Closed at publication

7 closed by this release, 8 already closed; none held

Changes and GitHub issues are counted separately. A change is one titled entry in the v4.17.0 CHANGELOG section; entries under Test, Doc, Known limits, Upgrade, Migration or Operator guidance headings are listed under the hood but not counted. A GitHub issue counts when release PR #1840 or the CHANGELOG section references it and it closed between the PR opening (4:45 PM ET) and 15 minutes after its merge (5:15 PM ET). Issues are closed by hand shortly after the merge, so a report run inside that window waits for referenced issues that are still open. No GitHub issues are counted in this report's fixes ledger. The timing receipt records no blockers and zero interventions; these zero figures are omitted above. Not measured for this release: request to published, cut to published, lesson recurrence.

Closeout at publication: the v4.17.0 binary (reconciler version 4.17.0, per the release reconcile receipt for the shipped commit) reconciled its own release at 5:21 PM ET. All 15 shipped tasks are closed: 7 closed by the release and 8 were already closed. Four containing epics stayed open because they still hold unfinished work.

What you can do now

Replies that arrive, releases that check themselves

Commander replies arrive

WAS

replies addressed to any device expired unread, even with Commander open.

NOW

the first signed-in device to receive a reply settles it.

Commands reach an idle session

WAS

Commander could refuse a command as "busy" while the session was idle.

NOW

readiness is read from the live pane, not a scrolled view.

No unreviewed work ships

WAS

a release could go out with its own changes never reviewed.

NOW

the cut refuses until every change in the release has a review.

No self-graded approvals

WAS

the session running the work could approve a design it had commissioned.

NOW

anything you are asked to approve gets an independent review first.

One notice per review

WAS

recording a release review sent one notice per held task.

NOW

one notice lists what closed and what is held, grouped by reason.

03 / 06

Under the hood

Release changes

Commander delivery

WAS

device_receipts matched a "*" recipient only against a literal device id, so 52+ supervisor replies were abandoned with 0 delivery attempts.

NOW

a None or "*" recipient closes on any authenticated device's receipt; forwarding attempts are counted.

Supervisor readiness

WAS

commander_native_input_ready and startup recovery read the scrolled viewport (dump_row).

NOW

they read the live row (dump_live_row).

Cut preview

WAS

refused only when would_close == 0.

NOW

also refuses when any included task is REVIEW_MISSING; older-release residuals stay residuals.

Close-at-release

WAS

approved verdicts bound to a synthetic candidate commit were held as REVIEW_MISSING.

NOW

an approved verdict whose candidate manifest binds the delivery anchor and ships its tree closes the member.

Supervisor guidance

WAS

supervisor_direct verdicts were invited for any deliverable; per-member close holds arrived one notice each.

NOW

supervisor_direct is for mechanical evidence only, holds are grouped per receipt, and one close-recovery rule applies.

Tooling

WAS

candidate builds rejected 8-character revisions; `bash -n` syntax checks were refused as nested shells.

NOW

any abbreviated revision prefix is accepted, and syntax-only checks pass.

Evidence and scope

Each change is placed in a product area by the words in its title, then its text; a change that matches no area is listed under Other.

Release PR: https://github.com/Richards-LLC/cassy/pull/1840 (https://github.com/Richards-LLC/cassy/pull/1840) (merged 11 November 2026 · 5:00 PM ET).

Release-notes draft: release source (https://github.com/Richards-LLC/cassy/blob/2e3cbe7c511c414006552d62eda7374104ac83dc/docs/release-notes/2026-11-11-v4.17.0-slack.md). Posted User thread (https://petra-stella.slack.com/archives/C0B44GUKDK2/p1794435672408509) and Dev thread (https://petra-stella.slack.com/archives/C0B44GUKDK2/p1794435674414169).

CHANGELOG source: published CHANGELOG (https://github.com/Richards-LLC/cassy/blob/2e3cbe7c511c414006552d62eda7374104ac83dc/CHANGELOG.md).

GitHub release: https://github.com/Richards-LLC/cassy/releases/tag/v4.17.0 (https://github.com/Richards-LLC/cassy/releases/tag/v4.17.0) (published 11 November 2026 · 5:20:16 PM ET).

Release receipt (relative to ~/.cas/artifacts): `release/v4.17.0-latency/release-latency.receipt`.

Published identity: annotated tag `a2e97f27877f498fd18cc22050a4354301b1850a` points to shipped commit `2e3cbe7c511c414006552d62eda7374104ac83dc`. Publication and all three asset digests were re-read from the GitHub API (https://api.github.com/repos/Richards-LLC/cassy/releases/tags/v4.17.0).

Validation: one merge-queue run (https://github.com/Richards-LLC/cassy/actions/runs/43106029912) proved the final release tree. No application journeys, installation success on every machine or before/after captures are claimed.

Timing endpoints: first child commit to main landing is 23,342 seconds against 1,800 (missed); main landing at 5:00:32 PM ET to GitHub publication at 5:20:16 PM ET is 1,184 seconds against 1,200 (met). Queue green at 5:00:08 PM ET to publication is 1,208 seconds against 1,200 (missed by 8). Stage timings are unavailable: the latency receipt records no STAGE_SECS.
