Release at a glance

▼ What shipped, by area

One dot is one change listed in the v4.18.0 CHANGELOG. Dots count changes, not their size or importance.

AREA	CHANGES	WHAT CHANGED
Sessions	1	Return failed hotfixes for correction
Tasks	1	Keep accepted deliveries through close recovery
Releases	1	Build from the requested revision
Total	3	3 areas

Source: CHANGELOG `CHANGELOG.md`, release-notes draft `docs/release-notes/2026-11-12-v4.18.0-slack.md`, GitHub `Richards-LLC/cassy` release v4.18.0; retrieved 11 November 2026 · 7:45 PM ET.

3

Changes listed

3 fixed; tests, docs, known limits and upgrade notes not counted

5m 45s

Main to published

Met the 20m budget; merged release to GitHub publication

4h 5m 5s

First child to main

Missed the 30m budget; first child commit to merged release

1

Queue runs

One merge-queue run proved the final tree

5m 47s

Green to published

Within budget (20m 0s budget); Merge-queue CI completion to publication

4 of 4

Closed at publication

1 closed by this release, 3 already closed; none held

Changes and GitHub issues are counted separately. A change is one titled entry in the v4.18.0 CHANGELOG section; entries under Test, Doc, Known limits, Upgrade, Migration or Operator guidance headings are listed under the hood but not counted. A GitHub issue counts when release PR #1848 or the CHANGELOG section references it and it closed between the PR opening (7:21 PM ET) and 15 minutes after its merge (7:51 PM ET). Issues are closed by hand shortly after the merge, so a report run inside that window waits for referenced issues that are still open. No GitHub issues are counted in this report's fixes ledger. The timing receipt records no blockers and zero interventions; these zero figures are omitted above. Not measured for this release: request to published, cut to published, lesson recurrence.

Closeout at publication: the v4.18.0 binary (reconciler version 4.18.0, per the release reconcile receipt for the shipped commit) reconciled its own release at 7:43 PM ET. All 4 shipped tasks are closed: 1 closed by the release and 3 were already closed. Two containing epics stayed open because they still hold unfinished work.

What you can do now

Smoother hand-offs after a merge

Shipped work stays done

WAS
a merged change waiting for its final review could hold up the next tasks, or be sent back to be redone.

NOW
it stays accepted, unblocks what depends on it, and only new changes need a fresh decision.

Broken hotfixes go back for a fix

WAS
a failed urgent fix could be left stranded.

NOW
it returns to be corrected.

A steadier Commander check

WAS
one Commander reading test failed at random and held up releases.

NOW
it checks a reader parked mid-conversation and a reader following new messages separately, and passes reliably.

Test builds from the right version

WAS
building a test copy of a newer version needed an updated checkout.

NOW
the build uses the requested version's own tools.

03 / 06

Under the hood

Release changes

Post-merge recovery

WAS

a landed delivery pending batch QA blocked dependents after administrative recovery, and post-merge close gates returned the worker to source delivery.

NOW

accepted upkeep decisions cover narrower findings at the same immutable delivery; post-merge gates stay with the supervisor and keep the parked delivery.

Fast-lane hotfixes

WAS

a failed fast-lane ReceiptGate went down the automatic-recovery path and stranded a reverted hotfix.

NOW

it uses the corrective-return helper again.

HUB-J4

WAS

on CI Linux fonts the fixture's reader sat at the tail, so a 17px note wrap failed a mid-thread stability assertion.

NOW

the fixture scrolls off the tail deterministically before the drop, and tail-follow is asserted separately. Hosted pass: precheck run 43124043953.

QA candidates

WAS

`cas qa candidate build` loaded its builder from the cwd checkout.

NOW

it loads the builder and helpers from `--rev`.

Evidence and scope

Each change is placed in a product area by the words in its title, then its text; a change that matches no area is listed under Other.

Release PR: https://github.com/Richards-LLC/cassy/pull/1848 (https://github.com/Richards-LLC/cassy/pull/1848) (merged 11 November 2026 · 7:36 PM ET).

Release-notes draft: release source (https://github.com/Richards-LLC/cassy/blob/0cb490aecbc5db38a9502386744f05a1d64552ee/docs/release-notes/2026-11-12-v4.18.0-slack.md). Posted User thread (https://petra-stella.slack.com/archives/C0B44GUKDK2/p1794444160083969) and Dev thread (https://petra-stella.slack.com/archives/C0B44GUKDK2/p1794444161516929).

CHANGELOG source: published CHANGELOG (https://github.com/Richards-LLC/cassy/blob/0cb490aecbc5db38a9502386744f05a1d64552ee/CHANGELOG.md).

GitHub release: https://github.com/Richards-LLC/cassy/releases/tag/v4.18.0 (https://github.com/Richards-LLC/cassy/releases/tag/v4.18.0) (published 11 November 2026 · 7:42:12 PM ET).

Release receipt (relative to ~/.cas/artifacts): `release/v4.18.0-latency/release-latency.receipt`.

Published identity: annotated tag `edf17b8861b39c1164bdad35c679b8bd5bffbf2b` points to shipped commit `0cb490aecbc5db38a9502386744f05a1d64552ee`. Publication and all three asset digests were re-read from the GitHub API (https://api.github.com/repos/Richards-LLC/cassy/releases/tags/v4.18.0).

Validation: one merge-queue run (https://github.com/Richards-LLC/cassy/actions/runs/43126872436) proved the final release tree. No application journeys, installation success on every machine or before/after captures are claimed.

Timing endpoints: first child commit to main landing is 14,705 seconds against 1,800 (missed); main landing at 7:36:27 PM ET to GitHub publication at 7:42:12 PM ET is 345 seconds against 1,200 (met). Queue green at 7:36:25 PM ET to publication is 347 seconds against 1,200 (met). Stage timings are unavailable: the latency receipt records no STAGE_SECS.
