What you can do now

02 / 06

Only reply (user)

Whole history

WAS opening a conversation showed only the current session's messages, often nothing. →

NOW everything you asked and everything Cassy answered for that project, across sessions, with a light divider between sessions and a clear "No earlier history" end.

Older replies read well

WAS a status answer from an older session arrived as one paragraph. →

NOW it shows a bold lead line and a numbered list even without formatting in the text.

Compact list

WAS one long reply could fill the Conversations screen. →

NOW every row previews two lines.

Under the hood

03 / 06

Only reply (dev)

Store/daemon/hub

WAS `PromptQueueStore::conversation_history` keyed on `factory_session`. →

NOW project-wide with verified-device and recipient filters intact, chronological cursor paging, session metadata on history rows; hub-web renders dividers and the end marker (PR #947).

Renderer

WAS bodies without Markdown rendered as split paragraphs. →

NOW lead-gated "(1) ... (2) ..." enumerations become an ordered list with a bold lead; Markdown bodies untouched (PR #946). Conversation-list previews clamp to two lines / 160 chars with an allowlisted intentional clip (PR #945).

Release train

WAS assemble self-heal lacked `CAS_FACTORY_SESSION` under the stripped launch env; prep bump read `CHANGELOG` relative to `cwd`; announce lint hid the offending line. →

NOW `factory_session` recorded in `run.env` and passed only to the recover subprocess; prep runs in the worktree; lint prints the line (PR #944).

Assets

WAS n/a. →

NOW `cas-x86_64-unknown-linux-gnu.tar.gz`
`d154f02697b40f48222562bea1ef123ba4abfbc1ea84e5df2297b0c0dd337317`; `cas-aarch64-apple-darwin.tar.gz`
`59512aa2c14a8ea12c4ecabc924282f31a68d90bc0f60b6678cb1ac349843d6c`.

GitHub issue theme assignment uses labels first, then the keyword table in the CLI. Any issue classified as Unclassified is shown in the map so a human can correct the Markdown before rendering.
