What you can do now

02 / 06

Checks and notices

Quick check works everywhere

WAS the fast validation for small changes failed on every push because the build machine lacked a search tool.

NOW it uses what the machine has and passes on clean changes.

One notice, not thirteen

WAS a finished change that was already merged kept being reported as "not merged" every few minutes.

NOW it is reported once, with the actual reason it cannot close yet.

Under the hood

03 / 06

CI

Fast tier without ripgrep (#836)

WAS Scoped Validation (fast) exited 2 with `rg exit 127` on GitHub-hosted runners, so every small factory push went red.

NOW the proof-surface script resolves one `grep` backend (`rg` if present, else `git grep -n` over tracked files) with a self-test that masks `rg`; the release gate's `rg`-free archive mode still passes.

Factory

Merged, close blocked (#835)

WAS `events.is` rendered every `AwaitingMerge` child as a merge demand and the stall tracker refired unchanged state every 10 minutes.

NOW when the parked anchor is an ancestor of the live target tip the task is classified `merged_close_blocked`; the relay carries the last close-rejection note and close guidance, is keyed by `task/anchor/target` tip, and repeats only when that key changes.

Fixes ledger

04 / 06

Issue register · 2 verified closures

ISSUE	STATE	CLOSED	THEME
#836 (https://github.com/Richards-LLC/cassy/issues/836)	CLOSED	2026-09-11T04:12:02Z	Factory
#835 (https://github.com/Richards-LLC/cassy/issues/835)	CLOSED	2026-09-11T04:12:03Z	Factory

```
cas update # install v3.25.3 through the project's normal release channel
```

GitHub issue theme assignment uses labels first, then the keyword table in the CLI. Any issue classified as Unclassified is shown in the map so a human can correct the Markdown before rendering.
