

Each account opens on a model it can use, and the Commander shows only sessions with a live supervisor.

SURFACE		CLOSED
Launching	no listed issues	0
Factory		2
Commander	no listed issues	0
Hub and Commander		1

Factory leads the closure map with 2 issues.

One dot, one closed issue. 2 issue-bearing surfaces.

Launching	0	No listed issues
Factory	2	#820, #830
Commander	0	No listed issues
Hub and Commander	1	#826
Total	3	2 issue-bearing themes

What you can do now

02 / 06

Launching

Right model for the account

WAS choosing a Codex profile could open Codex on a Claude model and fail immediately.

NOW the pane opens on a model the chosen harness supports, and a deliberately wrong choice is refused up front with a clear message.

Commander

Live sessions only

WAS the conversation list included sessions with no supervisor and no workers.

NOW only sessions with an active supervisor appear; dormant ones sit behind an off-by-default toggle.

Steadier checks

WAS one hub check could fail at random on a busy machine.

NOW it proves the old process is gone instead of comparing process numbers.

Under the hood

03 / 06

Factory

Per-harness launch recipes (#820)

WAS `FactoryConfig.supervisor_model/effort` came from `llm.model_for_role("supervisor")` after `resolve_supervisor_spec`, so `cli=codex` still launched with `claude-fable-5-1`.

NOW `normalize_spec_for_harness` in `cas-factory` routing repairs an inherited incompatible model/effort to the harness recipe and refuses an explicit one at preflight; the pane wiring reads the resolved spec (`cas-cli` factory, `daemon`, `cas-mux`).

Hub and Commander

Dormant sessions	WAS the session catalog and conversation list included sessions with no registered live supervisor. NOW the catalog marks sessions without an active supervisor (liveness evidence, not the session record) as dormant; hub-web hides them by default with a toggle, and a supervisor exit removes the row on the next refresh.
hub_clean_home_test (#826)	WAS assert_ne!(old_pid, new_pid) flaked on PID reuse. NOW teardown proves the old process is gone via pid + start time.

Fixes ledger
