What you can do now

02 / 06

Only reply (user)

Clear selection

WAS the selected conversation and the active machine were marked by a faint shade. →

NOW each has a bold coloured edge in light and dark.

Fewer false alarms

WAS Cassy sometimes asked for work to start that was still waiting on something else. →

NOW it only suggests work that can actually start.

Smoother updates

WAS an update could stall while being prepared, or finish without being installed on the machine. →

NOW it installs itself and confirms the new version is running.

Under the hood

03 / 06

Only reply (dev)

hub-web

WAS `.conversation-row[aria-current]` and `.machine-icon.active` marked by a fill only (1.16-1.39:1). →

NOW `3px var(--accent) edge bar, ≥3:1 in every accent set`, pinned by `machine-accent.test.ts`; harness scores selected states by their best cue (PR #960).

Factory

WAS `supervisor_stalled AssignReadyWork` named Open tasks behind an open `requires_start` dependency. →

NOW `DirectorData.start_gated_task_ids` excludes them, same predicate as task start (PR #959).

Release train

WAS `release-integrate.py` held the `delivery-target` flock while its heal ran `integration-recover` on the same lock; `host-update` wrote a done receipt without installing. →

NOW heal runs unlocked then revalidates; `release-host-update.py` installs and proves `cas-version`, `hub version` and `refresh_binary_version` (PR #958).

Assets

WAS n/a. →

NOW `cas-x86_64-unknown-linux-gnu.tar.gz`
`51227f0e19e3034f7f27ff223c67f7894ff63ad40d95f3fa7579d8f79298ce97`; `cas-aarch64-apple-darwin.tar.gz`
`6af03ff573a3fcb63611a3f0219e9a3a4e455342407073abce545d248bc0ade`.
