What you can do now

02 / 06

Only reply (user)

Landings are noticed

WAS after a change landed, nothing happened until someone looked. →

NOW Cassy picks it up at once and tells you if a step is still open five minutes later.

Second tasks start clean

WAS a second task could drag the first task's changes along with it. →

NOW the slate is reset, or you get the exact fix before anything starts.

Conflicts get resolved

WAS resolving a merge conflict could stall at the last step. →

NOW it completes on its own.

Releases cut cleaner

WAS the 3.27.3 release needed seven hand steps. →

NOW each of them is automated and self-tested.

Under the hood

03 / 06

Only reply (dev)

Daemon

WAS no view of delivery PRs. →

NOW PR numbers and merge commits recorded on the task; one typed assignee wake with the close command; supervisor relay after five minutes (PR #941).

Task start

WAS factory/<worker> kept prior commits. →

NOW reset when the prior delivery is merged, refuse with `git rebase --onto` otherwise; envelope carries `commits_not_on_target_base` (PR #938).

Guards

WAS commit guard refused detached rebase HEAD; checkout-read guard scanned only `cas-cli/tests`. →

NOW branch from `rebase-merge/head-name` (PR #939); every test-bearing source including `lib cfg(test)` modules (PR #942).

Release train	WAS receipts via docs PR; stale lockfile, wall-clock draft date, post-publish lint, enqueue race. → NOW receipts commit on the release branch (PR #933); lockfile refresh, docs-only rebase, pinned run date, preflight lint, checks-aware enqueue (PR #940).
Integration	WAS union sweep conflicted on ancestor epics; close gate suggested fewer targets than the checker demanded. → NOW ancestors skipped and base named (PR #936); one shared derivation, cached per close (PR #937).
Assets	WAS n/a. → NOW cas-x86_64-unknown-linux-gnu.tar.gz 249b2380e9fee590e00f01baea5a46b904a4ad5fd7fc6b000c0c89996efd13c1; cas-aarch64-apple-darwin.tar.gz a656776271c56a7d958a38125ffd4d9f2b65ef7097daa8427ad1fbf5265c25f9.
