

Clearer proof for
work and releases;
quieter waiting and
more relevant recall.

SURFACE		CLOSED
QA	no listed issues	0
Release	no listed issues	0
Daemon	●	1
Memory	●	1

QA and release reporting gain a shared evidence path; the two closures repair daemon waiting and memory recall.

One dot, one closed issue. 2 issue-bearing surfaces.

Release at a glance

01 / 06

2 Issues closed Named release issues verified CLOSED on GitHub	5 Features added Top-level Added entries in CHANGELOG 3.20.0	2 Fix entries Top-level Fixed entries; one per named issue	39m 58s Green to published Full release-gate green at 22:37:27Z to publication at 23:17:25Z; 2398 seconds
---	---	---	--

Eight changelog entries: five Added, one Changed, two Fixed. Counts are entries, not independent features or a comparison with v3.19.0. The two PR #770 issues closed between 2026-09-08T22:01:47Z and 22:24:07Z, before publication; this is not a repository-wide closure census.

▼ Change map · data and reading guide

One dot means one verified closure, not severity. QA and Release add capabilities without counted closures.

Change map data · closed issues by surface

SURFACE	ISSUES CLOSED	ISSUE NUMBERS
QA	0	QA capabilities; no counted closure
Release	0	Report capability; no counted closure
Daemon	1	#754
Memory	1	#764
Total	2	Two issue-bearing surfaces; four change themes

Source: Release PR #770 (<https://github.com/Richards-LLC/cassy/pull/770>) and its two closed issues, retrieved 2026-09-08 23:24 UTC. Theme order follows the release scope; dots count repairs, while prose describes capabilities.

Clearer work requests

Name the outcome before work begins

WAS user-facing work could start without an observable outcome.

NOW configured labels require a demo statement, repeated in worker briefs. Epics, unlabeled work and supervisor overrides are exempt.

Honest QA

Explore within a useful decision window

WAS exploratory QA lacked a clear stopping point.

NOW `cas-qa-craft` supplies a matrix, adjacent-risk checks, evidence labels and a 30-minute box.

Keep the evidence behind the result

WAS close prose could hide what was actually exercised.

NOW `LEDGER.md` records verdicts, captures and honest NOT EXERCISED results; verification checks that evidence before the close reason.

Recall the relevant lesson

WAS recall missed same-day lessons while semantic search timed out.

NOW recent, deeply matching memories outrank old shallow rule matches; semantic search has bounded deadlines.

Release clarity

Open a report you can inspect

WAS release reporting needed a bespoke source-to-PDF path.

NOW `cas-release-report` provides the renderer, brief, template and PDF recipe; the v3.19.0 exemplar demonstrates them, and the announcement draft links the report.

Leave the CPU free while waiting

WAS an idle code watcher could keep a core busy.

NOW `cas serve` waits for filesystem events without spinning.

Task and QA contracts

A configurable creation gate

WAS public-surface labels did not require a demo statement.

NOW `qa.user_facing_labels` defaults to `ui`, `hub`, `cli-ux`, `commander` and `frontend`; creation requires a statement, except for epics, unlabeled tasks and deliberate supervisor overrides.

An exploration ledger with evidence labels

WAS QA prose blurred inference, fixtures and actual-build observations.

NOW `cas-qa-craft` caps eight cells, adds three unmentioned conditions and an adjacent surface, labels evidence and marks unrun cells `NOT EXERCISED` after 30 minutes.

Evidence mode precedes capture judgment

WAS verifiers could judge close prose before its supporting evidence.

NOW the evidence-mode `REJECT` table runs before captures open; each capture judgment accompanies its row and close reason.

Release controls

One reusable report renderer

WAS each release needed bespoke source, design and PDF production.

NOW `cas-release-report` supplies the renderer, template, brief, token mapping and A4/Letter recipe, with continuous flow and fidelity checks.

An exemplar carried into preparation

WAS the repository lacked a complete release-report example.

NOW preparation carries forward the v3.19.0 Markdown, brief, HTML, PDF and QA receipt.

An explicit publication handoff

WAS announcements could omit report artifacts or publication proof.

NOW step 13 requires the report after publication, before authorized Slack posts. Drafts link source/HTML/PDF; the rubric retains four ordered posting receipts.

Runtime efficiency

A watcher that blocks when idle

WAS the code watcher's idle path could spin without a filesystem change.

NOW the idle path waits for events. This report records the shipped fix for #754; it does not claim a new CPU benchmark.

Ambient recall quality

Bound search and remove ranking noise

WAS a 30-second connect timeout sat outside the 400-millisecond semantic budget; old shallow rule matches outranked recent exact-overlap memories, unrelated task titles padded prompts, and tool triggers included hex IDs and durations.

NOW connect and request deadlines are bounded, decision traces include timings, recency and overlap depth affect fusion, strong prompts avoid unrelated padding, and dictionary-like trigger terms filter noisy IDs and durations.

Fixes ledger

04 / 06

Issue register · 2 verified closures

ISSUE	SURFACE	WAS → NOW	CLOSED AT (UTC)
#754 (https://github.com/Richards-LLC/cassy/issues/754)	Daemon	Idle code watchers could spin a core → the idle path waits for file changes.	2026-09-08 22:01:47
#764 (https://github.com/Richards-LLC/cassy/issues/764)	Memory	Semantic timeouts, stale shallow matches and noisy triggers → bounded search, recency/overlap ranking and cleaner terms.	2026-09-08 22:24:07

States and closure times come directly from GitHub. #764 counts once despite several failure modes; QA and Release have no counted closures.

Install

05 / 06

Update an existing installation:

```
cas update
cas --version
```

Expected version for this report: 3.20.0. For an exact-version installation, use the archives on the published v3.20.0 release (<https://github.com/Richards-LLC/cassy/releases/tag/v3.20.0>).

Linux x86_64: [cas-x86_64-unknown-linux-gnu.tar.gz](https://github.com/Richards-LLC/cassy/releases/download/v3.20.0/cas-x86_64-unknown-linux-gnu.tar.gz) (https://github.com/Richards-LLC/cassy/releases/download/v3.20.0/cas-x86_64-unknown-linux-gnu.tar.gz). SHA-256: 927ce9b5a594bb7d6d14858c043415587e61c30f3a377ab4e432b22242425b35

macOS ARM64: [cas-aarch64-apple-darwin.tar.gz](https://github.com/Richards-LLC/cassy/releases/download/v3.20.0/cas-aarch64-apple-darwin.tar.gz) (<https://github.com/Richards-LLC/cassy/releases/download/v3.20.0/cas-aarch64-apple-darwin.tar.gz>). SHA-256: a39b21961c94d1f77174e257b27503c76b04b1db6a816704e47aa05ef2ef49c5

Digests match the publication receipt and GitHub asset metadata; archives were not redownloaded and installed binaries were not rerun. `cas` update follows the current release; archive links pin v3.20.0.

Evidence and scope

06 / 06

Published commit: 46ffecde8010f40df1b64831146a5cb702ec455d, tag v3.20.0. Publication time: 2026-09-08T23:17:25Z. Sources were retrieved 2026-09-08 23:24 UTC.

- CHANGELOG at v3.20.0 (<https://github.com/Richards-LLC/cassy/blob/v3.20.0/CHANGELOG.md>): section 3.20.0 is the eight-entry release inventory.
- Release PR #770 (<https://github.com/Richards-LLC/cassy/pull/770>): scope, merge commit and named issues.
- Announcement draft at publication (<https://github.com/Richards-LLC/cassy/blob/v3.20.0/docs/release-notes/2026-09-08-v3.20.0-slack.md>): user/developer themes and Was → Now wording. At the tag it still contains unfilled digest fields; this report uses the publication receipt and GitHub asset metadata instead.
- Issue #754 (<https://github.com/Richards-LLC/cassy/issues/754>) and issue #764 (<https://github.com/Richards-LLC/cassy/issues/764>): directly queried with `gh issue view NUMBER --repo Richards-LLC/cassy --json title,body,url,closedAt,state`. No other issues were counted.
- Published release (<https://github.com/Richards-LLC/cassy/releases/tag/v3.20.0>): queried with `gh release view v3.20.0 --repo Richards-LLC/cassy --json tagName,publishedAt,url,assets`.
- Release workflow run (<https://github.com/Richards-LLC/cassy/actions/runs/34289736144>): the publication receipt identifies this tag run.

Timing: `/home/pippenz/.cas/artifacts/release/v3.20.0-epic-9341-merge/` contains `gate.green.epoch`, `pipeline.log`, `release-published.receipt` and `release-latency.receipt`. Green epoch 1788907047 (22:37:27 UTC) to publication (23:17:25 UTC) is 2398 seconds. Tag push (23:14:35 UTC) to publication is separately 170 seconds, or 2m 50s.

Snapshots: `/home/pippenz/.cas/artifacts/cas-16a3/sources/`. Source: `docs/release-reports/2026-09-08-v3.20.0.md`. Built-in skill `renderer/template`; tokens: `docs/design/design-tokens.json`. Browser and PDF proof is in the adjacent brief and QA receipt.

Scope: a publication brief, not a runtime benchmark. Dots do not measure impact, effort or exhaustive coverage. Timing documents the release process; report QA exercises this document.

Cassy v3.20.0 / Clearer proof. Quieter waiting. Relevant recall.
