What you can do now

02 / 06

Only reply:

History on open

WAS the hub only remembered messages while the page stayed open; a fresh open or a hub restart showed nothing. →

NOW opening a conversation brings back your messages and Cassy's replies for that machine, with a control to load earlier ones.

Only your conversation

WAS n/a. →

NOW history is limited to messages sent from your paired device and replies addressed to it; terminal output is never shown.

Needs both sides updated

WAS n/a. →

NOW a machine still on an older version keeps the previous behaviour until it updates.

Under the hood

03 / 06

Only reply:

Store

WAS no history read. →

NOW `PromptQueueStore::conversation_history(session, device, before, limit)` returns verified Commander sends for that device plus operator-lane replies addressed to it or to the wildcard recipient, ordered with an explicit cursor.

Protocol

WAS n/a. →

NOW a history request/response pair on the client/daemon protocol, request-correlated; the hub enforces the authenticated device id before dispatch and gates the page by request id.

hub-web

WAS hydration impossible. →

NOW `ConversationHistory` hydrates from the page before live frames, dedupes by notification id and client ref, renders through the Pebble thread model, and pages with "load earlier"; dist rebuilt once.

Assets

WAS n/a. →

NOW cas-x86_64-unknown-linux-gnu.tar.gz
6b133293dec37ac46670837e123ed262bacb5e3198b6298c75e8edbf72161511; cas-aarch64-apple-darwin.tar.gz

GitHub issue theme assignment uses labels first, then the keyword table in the CLI. Any issue classified as Unclassified is shown in the map so a human can correct the Markdown before rendering.
