What you can do now

02 / 06

Only reply (user)

Every live conversation shows

WAS a project that was running but had no helpers at work was hidden from the hub, so the machine looked empty. →

NOW it is listed as soon as it is running; only stalled, empty ones stay hidden.

Older status replies read well

WAS a status reply like "Status 13:2xZ." still arrived as one paragraph. →

NOW it shows a bold lead line and a list.

Empty conversations

WAS a new conversation said "No earlier history". →

NOW it shows the empty state.

Under the hood

03 / 06

Only reply (dev)

Hub catalog

WAS `supervisor_sessions` default filter required `!workers.is_empty()`, hiding live supervisors with zero workers. →

NOW default lists every Live non-dormant supervisor session; `workers=1` and `dormant=1` reveals unchanged; tests pin staffed, empty-roster, worker-only, hung-empty and dormant rows (PR #952).

Renderer

WAS the legacy lead regex required two-digit minutes, so "Status 13:2xZ." never restructured; empty threads showed the end marker. →

NOW lead matches the real text; empty threads render the empty state (PR #951).

Release train

WAS assemble self-heal's integration-recover refused without the recorded supervisor identity; post-publication lacked the date helper. →

NOW recorded identity passed to recovery; helper sourced (PR #950).

Assets

WAS n/a. →

NOW `cas-x86_64-unknown-linux-gnu.tar.gz`
`a838e0127b7d3a839c7bb5d492a07352408061c934d16a0b63d73ccabc37beb3`; `cas-aarch64-apple-darwin.tar.gz`
`8dac0c863f48e112ede3c19af4ff24d7c20eb362179dead3f6390069d1b839ac`.
